

ELEMENTAL ALTUS ROYALTIES ANNOUNCES 2024 GUIDANCE, FORECASTING SEVENTH CONSECUTIVE YEAR OF RECORD REVENUES

April 4, 2024 – Vancouver, BC: Elemental Altus Royalties Corp. (“Elemental Altus” or the “Company”) (TSX-V: ELE, OTCQX: ELEMFM) is pleased to announce materially higher guidance for 2024 building on record Adjusted Revenue¹ in 2023.

Highlights

- **2024 Guidance:** 10,000 to 11,700 Gold Equivalent Ounces¹ (“GEOs”) representing at its midpoint a 20% increase on 2023 and an 85% increase from 2022
- **Growth Catalysts:** Organic royalty revenue growth driven by Diba and Bonikro royalties
- **Royalty Revenue Forecast:** Adjusted Revenue of approximately US\$20.0 to US\$23.3 million at prices of US\$2,000 per ounce of gold and US\$3.90 per pound of copper
- **Additional Revenue:** Alongside royalty revenue, the Company expects to receive approximately US\$20 million in payments from the portfolio over 2024 and 2025

Frederick Bell, CEO of Elemental Altus, commented:

“With 2024 expected to be another record performance, we are continuing our track record of increasing revenue every year since inception. This is made possible by the diversified portfolio the Elemental Altus team has assembled in a disciplined manner with producing royalties on high quality mines with proven operators. Material organic growth this year is expected to be driven by our royalties over Bonikro and Diba, both operated by newly-listed Allied Gold. Our royalty at Bonikro covers Pushback 5 which is expected to be the main production area for the next several years having successfully ramped up production at the end of 2023. Meanwhile, Allied have guided to first production at Diba in H1 2024, in parallel with growing the resource to provide potentially very significant long-term upside exposure.”

Looking ahead, Elemental Altus continues to be in a robust position to expand its high quality and sustainable, revenue generating portfolio, supported by a strong cash position, ongoing royalty receipts and funds available through the credit facility with National and CIBC, which we expect will generate material shareholder value in the years to come.”

Frederick Bell
CEO and Director

About Elemental Altus Royalties Corp.

Elemental Altus is an income generating precious metals royalty company with 11 producing royalties and a diversified portfolio of pre-production and discovery stage assets. The Company is focused on acquiring uncapped royalties and streams over producing, or near-producing, mines operated by established counterparties. The vision of Elemental Altus is to build a global gold royalty company, offering investors superior exposure to gold with reduced risk and a strong growth profile.

Qualified Person

Richard Evans, FAusIMM, is Senior Vice President Technical for Elemental Altus, and a qualified person under National Instrument 43-101 – Standards of Disclosure for Mineral Projects, has reviewed and approved the scientific and technical disclosure contained in this press release.

Notes**1. Non-IFRS Measures**

The Company has included certain performance measures which are non-IFRS and are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. These non-IFRS measures do not have any standard meaning under IFRS and other companies may calculate measures differently.

Royalty revenue is received at zero cost. Distributions from associates related to Elemental Altus' effective royalty on Caserones are received net of Chilean taxes and have no other costs.

Adjusted Revenue

Adjusted revenue is a non-IFRS financial measure, which is defined as including gross royalty revenue from associated entities holding royalty interests related to Elemental Altus' effective royalty on the Caserones copper mine. Management uses adjusted revenue to evaluate the underlying operating performance of the Company for the reporting periods presented, to assist with the planning and forecasting of future operating results, and to supplement information in its financial statements. Management believes that in addition to measures prepared in accordance with IFRS such as revenue, investors may use adjusted revenue to evaluate the results of the underlying business, particularly as the adjusted revenue may not typically be included in operating results. Management believes that adjusted revenue is a useful measure of the Company performance because it adjusts for items which management believes reflect the Company's core operating results from period to period. Adjusted revenue is intended to provide additional information to investors and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. It does not have any standardized meaning under IFRS and may not be comparable to similar measures presented by other issuers.

Gold Equivalent Ounces

Elemental Altus' adjusted royalty, streaming, and other revenue is converted to an attributable gold equivalent ounce, or GEO, basis by dividing the royalty and other revenue from associates in a period by the average gold price for the same respective period, plus the net gold ounces received in the period from streaming investments. The presentation of this non-IFRS measure is intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. Other companies may calculate these non-IFRS measures differently. The production forecast was derived using information that is available in the

public domain as at the date hereof, which included guidance and estimates prepared and issued by management of the operators of the mining operations in which Elemental Altus holds an interest. The production forecast is sensitive to the performance and operating status of the underlying mines. None of the information has been independently verified by Elemental Altus and may be subject to uncertainty. There can be no assurance that such information is complete or accurate.

On behalf of Elemental Altus Royalties Corp.

Neither the TSX-V nor its Regulation Service Provider (as that term is defined in the policies of the TSX-V.) accepts responsibility for the adequacy or accuracy of this press release.

Cautionary note regarding forward-looking statements

This news release contains certain “forward looking statements” and certain “forward-looking information” as defined under applicable Canadian securities laws. Forward-looking statements and information can generally be identified by the use of forward-looking terminology such as “may”, “will”, “should”, “expect”, “intend”, “estimate”, “anticipate”, “believe”, “continue”, “plans” or similar terminology.

Forward-looking statements and information include, but are not limited to, statements with respect to the date that the name change is expected to become effective, whether shareholders will be required by their broker to exchange their issued certificate for a new certificate or take any other action in connection to the name change, the Company’s ability to deliver a materially increased revenue profile with a lower cost of capital, the future growth, development and focus of the Company, and the acquisition of new royalties and streams. Forward-looking statements and information are based on forecasts of future results, estimates of amounts not yet determinable and assumptions that, while believed by management to be reasonable, are inherently subject to significant business, economic and competitive uncertainties and contingencies.

Forward-looking statements and information are subject to various known and unknown risks and uncertainties, many of which are beyond the ability of Elemental Altus to control or predict, that may cause Elemental Altus’ actual results, performance or achievements to be materially different from those expressed or implied thereby, and are developed based on assumptions about such risks, uncertainties and other factors set out herein, including but not limited to: the impact of general business and economic conditions, the absence of control over the mining operations from which Elemental Altus will receive royalties, risks related to international operations, government relations and environmental regulation, the inherent risks involved in the exploration and development of mineral properties; the uncertainties involved in interpreting exploration data; the potential for delays in exploration or development activities; the geology, grade and continuity of mineral deposits; the impact of the COVID-19 pandemic; the possibility that future exploration, development or mining results will not be consistent with Elemental Altus’ expectations; accidents, equipment breakdowns, title matters, labour disputes or other unanticipated difficulties or interruptions in operations; fluctuating metal prices; unanticipated costs and expenses; uncertainties relating to the availability and costs of financing needed in the future; the inherent uncertainty of production and cost estimates and the potential for unexpected costs and expenses, commodity price fluctuations; currency fluctuations; regulatory restrictions, including environmental regulatory restrictions; liability, competition, loss of key employees and other related risks and uncertainties. For a discussion of important factors which could cause actual results to differ from forward-looking statements, refer to the annual information form of Elemental Altus for the year ended 31 December 2022. Elemental Altus undertakes no obligation to update forward-looking statements and information except as required by applicable law. Such forward-looking statements and information represents management's best judgment based on information currently available. No forward-looking

statement or information can be guaranteed, and actual future results may vary materially. Accordingly, readers are advised not to place undue reliance on forward-looking statements or information.
