

Genesis Securityholders Approve Plan of Arrangement with Northern Superior Resources Inc. and BC Supreme Court Grants Final Order

Vancouver, British Columbia--(Newsfile Corp. - July 11, 2022) - **Genesis Metals Corp. (TSXV: GIS)** ("**Genesis**" or the "**Company**") today announces that it has been granted the final court order from the British Columbia Supreme Court approving the plan of arrangement (the "**Arrangement**") with Northern Superior Resources Inc. ("**Northern Superior**"). Pursuant to the Arrangement, Northern Superior has agreed to acquire all of the issued and outstanding common shares of Genesis ("**Genesis Shares**") on the basis of 0.2304 of a Northern Superior common share per Genesis Share under the terms of the Arrangement. Receipt of the final court order followed approval of a resolution (the "**Arrangement Resolution**") to approve the Arrangement at a special meeting of securityholders of the Company, which was called for shareholders and optionholders (the "**Securityholders**") to vote on the Arrangement Resolution and held on June 7, 2022 (the "**Meeting**").

The Arrangement Resolution required the approval of (i) 66⅔% of the votes cast by Securityholders, voting together as a single class, present in person or represented by proxy at the Meeting; (ii) 66⅔% of the votes cast by Genesis shareholders present in person or represented by proxy at the Meeting; and (iii) a simple majority of the votes cast by Genesis shareholders, excluding for this purpose votes attached to the Genesis Shares held by persons described in items (a) through (d) of Section 8.1(2) of Multilateral Instrument 61-101 *Protection of Minority Security Holders in Special Transactions*, which excluded votes cast by Dr. David Terry, the Company's President, CEO, and a Director.

The Arrangement was approved by the required majority of the votes cast by the Securityholders eligible to vote at the Meeting. A total of 17,973,601 securities of Genesis were represented in person or by proxy at the Meeting, representing approximately 26.19% of the outstanding securities of Genesis. The Arrangement Resolution was approved by (i) 99.44% of the votes cast by Securityholders, voting together as a single class, present in person or represented by proxy at the Meeting; (ii) 99.38% of the votes cast by Genesis shareholders present in person or represented by proxy at the Meeting; and (iii) 99.34% of the votes cast by Genesis shareholders, excluding votes cast by Dr. Terry.

The Arrangement is expected to be completed on or around July 13, 2022. For a more detailed description of the Arrangement, please refer to the Company's management information circular dated June 6, 2022.

About Northern Superior

The reader is encouraged to visit the Company's web site for more detailed information regarding each of these projects (www.nsuperior.com).

The Lac Surprise property is located within the Chapais-Chibougamau gold camp of Québec and is large (approximately 20kms x 20 kms). The Company recently discovered the Falcon Gold Zone (FGZ), a gold zone consisting of gold assay grades and widths comparable to the neighboring IAMGOLD Corporation and Vanstar Mining Resource's Nelligan deposit (hosts an NI 43-101 compliant inferred mineral resource estimate of 3.1 million ounces of gold at 1.02 g/t gold***). Highlighted assays associated with the FGZ include: LCS21-029 (1.36g/t Au over 40.0m; 273.00-313.00m); LCS19-005ext (1.54g/t Au over 44.9m; 293.50-338.40m); LCS21-43 (1.10g/t Au over 43.0m; 95.00-138.00m); and LCS21-032 (1.99g/t Au over 42.6m; 107.40-150.00m) (Table 1, Figure 4; see Northern Superior press releases, August 17, 2021; March 10, 2022).

The FGZ is thought to represent the westward extension of the Nelligan gold deposit. The robust, lateral continuity of the FGZ is highlighted by a 100% drill hole strike rate (29 of 29 holes), currently defined with a 900m long strike length (remaining open along strike to the west) and defined to 343m, remaining open at depth along the 900m strike length.

The Lac Surprise property has many gold showings across the property including those to the west of the FGZ, and in the "Confluence" and "Amber" areas. Northern Superior has recently completed a 15-hole (6,650m) core drill program designed to test the western and vertical extensions of the FGZ. The Company is currently executing a property scale bedrock mapping and prospecting program for the summer of 2022.

The Croteau Est property is also located within the Chapais-Chibougamau gold camp of Québec and is large (approximately 30kms x 15kms). The property has a **43-101 compliant inferred gold resource** defined and several gold showings discovered across the property. The inferred gold resource is defined as yielding **11.6 million tonnes, grading 1.7g/t gold, yielding 640,000 ounces of gold**. Assays associated with this deposit includes intersections of; **11.06g/t gold over 9.10m including 43.75g/t gold over 2.00m, 61.24g/t gold over 5.95m including 705g/t gold over 0.5 m, 7.50g/t gold over 7.95m including 56.40g/t gold over 1.00m, 1.99g/t gold over 34.65m including 9.46g/t gold over 2m**). The resource is defined from only 64, shallow holes, most of which are only 350m deep. The system is open along strike in both directions and at depth. A core drill program and budget has been set for this project to expand the resource and test several of the regional showings.

The TPK property is located in northwestern Ontario and is large (approximately 20kms x 30kms), containing two regional scale mineralized systems. The first system is primarily gold bearing, stretching 35kms across the Big Dam and New Growth areas of the property. The Big Dam area contains the largest gold grain-in-till dispersal aprons in North America stretching 6kms by 11kms, with as many as **1262 gold grains**, most of which are pristine (92%). Embedded within this apron are numerous high-grade gold mineralized boulders assaying as high as **94g/t gold**. A discovery hole of **25.87g/t gold over 13.45m** has already been intersected. The second system within the Annex area of the property is defined by a gold grain-in-till dispersal corridor 3.5kms x 13.5kms wide, with gold grain counts as high as **1263** gold grains, mostly pristine in shape. Embedded within this corridor are boulders assaying as high as **727g/t gold, 111g/t silver and 4.05% copper**.

Northern Superior is a reporting issuer in British Columbia, Alberta, Ontario and Québec, and trades on the TSX Venture Exchange under the symbol "SUP", and the OTCQB Venture Market under the symbol "NSUPF".
